

## Activity Report

**Unit: Mathematics Education Department**

**Community Based Project**

<b>Activity Title</b>	Community-Based Project: First Visit
<b>Date</b>	November 16, 2021
<b>Purpose</b>	We would like to design a math class for public schools where our graduates work. We paid a visit to the school to see and explore the environment.
<b>Place(Location)</b>	Harir-Hawler
<b>Person In Charge</b>	Dr. Orhan Tug, Head of Department
<b>Served Food</b>	Lunch
<b>Content</b>	<p>On November 16th, 2021, the head of the department accompanied by two of the department staff paid a visit to a public school in Harir, Hawler where a graduate of the department, Ms. Dilven works and teaches mathematics. It is part of this year's plan of the department to design a math classroom in public schools where our graduated students teach. This plan is a community-based project and aims at designing and equipping a classroom in public schools, painting, putting some mathematical items as well as smartboard and projector technology. One of the purposes is to keep in touch with our students and further support them. A key purpose indeed is to entertain students more toward mathematics by showing more visual stuff using technology.</p> <p>This was the first visit to the school, and we wanted to see the school environment and the classroom size, space, and facility that we will be designing. Moreover, in our visit we also met one of the principals of the school, we had a tour around the school and discussed how education goes nowadays.</p> <p>It is our hope and plan that we will design a very modern math classroom for them during this year.</p>
