Summary of the Project :
As Mathematics Education Department, we would like to design a mathematics classroom in a public school. We have plan to do this project in schools where our graduates work as a math teacher. The plan is to redesign the classroom with mathematical items, paint the walls with some mathematical shapes, and put technology to this class with Tishk International University Logo.

Goals & Objectives of the Project :
The main aim of this project is to contribute to schools educational environment and help them inspiring students more through modern classroom designs and the necessary technology.

The End Benefices: We aim to advertise the department of mathematics education by promoting our graduates after completing their program successfully and getting a job in a public school.

Success Criteria : The project will be counted successful if we have positive comments and responses from that school. We will also count the project as successful if everything goes well and if we can manage to make students happy at the end of the project.
